PROBLEM STATEMENT

Core Challenge

Netflix hosts 8,000+ titles across multiple genres, countries, and categories. Without structured data analysis, it is impossible to identify what type of content drives user engagement, which regions produce the most titles, and how content trends have evolved over time.

Which content type — Movies or TV Shows — dominates Netflix?

Which countries produce the most content on Netflix?

How has Netflix content grown year-over-year?

What are the most popular genres and ratings?

Goal: Deliver actionable insights to improve Netflix content strategy & recommendations.

TECHNOLOGY USED

Python

Core programming language for data analysis and scripting

TOOL

Pandas & NumPy

Data cleaning, transformation, and numerical operations

TOOL

Matplotlib

Creating static visualizations and publication-ready charts

TOOL
